

The Delaware Department of Natural Resources and Environmental Control (DNREC) approved Croda Inc.'s voluntary permit application for a flare system at the Atlas Point facility in New Castle, D.E. on December 4, 2024. Over the next year, our community can expect the following to happen:

- **NOW through the end of January 2025**, the U.S. Environmental Protection Agency (EPA) will review the permit application.
- **AFTER** this review, a federal construction permit may be issued.
- **ONCE** the construction permit is issued and construction begins, we expect it will take approximately **ONE YEAR** for the flare to become operational.

Anyone who have questions about Croda's flare permit, the construction process, or how flare operations will work may contact Croda at any time via [AtlasPoint.CE@croda.com](mailto:AtlasPoint.CE@croda.com) or the Atlas Point Community Information Line: (302) 429-5474.
